--	---	---

In the year 2002 Kreativa got the first assignment from Toshiba notebook division to implement international campaign to the East European countries – 7 countries in the first flight. The campaign was successfully implemented and the activities consisted mainly of media planning, buying and creative translation and adaptation. We were also in charge of complying with the advertising standards of the third parties that were

incorporated into ads – Microsoft and Intel.

We have been working for Toshiba ever since and our cooperation and coordination expanded into 18 countries of Central and East Europe, Turkey and Israel. This coordination is conducted through partner agencies and media buying houses throughout the region.

Enclosed is our latest campaign implemented in eight countries.

TOSHIBA – regional coordination

H Toshiba souvratá Windows Vista® Home Premium.
